TAMMANY LEADERS NOW WOR-RIED OVER GAME.

The attitude of the "Sulse." Can Do No Wrong" club has been the cause of a lot of worry to the Tanmany leaders. They are beginning to think that their pursuit of Sulser might not have been such a smooth political play after all. Their contention that they ought to be ommended for finding flaws in their him with the object of removing him from office doesn't appear to have as much political weight now as it had in the early days of the Frawley committee, in view of the fact that so many people think William Sulser has only done what politicians have been doing ever since elections have been held. The attitude of the Suizer supporters

has been aided by the State press, which tells the people that Tammany Hall is responsible for the prosecution of the Governor, and that the reason lies is nachine politics.

Republican and Progressive leaders are taking every advantage of the fight within the Democratic party to promote discord. In consequence the Democratic eaders are thinking deeply about the approaching elections and their thoughts are not altogether gratifying.

The Subser defense to the impossiment has been outlined. It is to be a stand pat proposition. The Severnor is to admit he used a lot of money he received in the last exampling for his —n purposes, but that gush use was authorised by political precedent. It is also to be contended that Mrs. Sulset, without the Governor's knewledge, and solely for the purpose of fertifying him against financial wreck, used money received for campaign purposes in eatisfying chilgations he had assumed before his nomination.
